Tuesday 18 March

Dear Parents/Caregivers,

Fonterra Milk for Schools

Tawhai School is interested in getting involved in the Fonterra sponsored 'Milk for Schools Programme', where nutritious milk will be supplied daily (for free!) for our young learners to enjoy and to promote healthy living. The milk comes in individual **...ml** cartons.

The type of milk Fonterra provide is called Anchor Life, which is put through the UHT process. UHT means Ultra-High Temperature and is a process used to sterilise the milk by rapidly heating it for an extremely short period of time. This increases the shelf life of the milk while protecting the levels of protein, carbohydrates and calcium normally found in fresh milk.

We are seeking feedback from our parent community to see if you would you like this programme introduced at Tawhai School? Would your child drink and enjoy a free daily drink of Anchor Life milk?

Could please complete and return the slip below. We will use this to make the decision whether the programme would be worthwhile at the school.

Kind Regards,

Matt Skilton
Principal
Tawhai School
