As a School Board it is our role to support the school leadership to ensure a strong and inclusive culture. We strive to foster a sense of belonging; strengthened through our shared values of respect, responsibility, resilience, and integrity.

We are responsible for setting the overall strategic direction for the School, determining major policies, setting the annual budget, and deciding how property funding is to be used. We also monitor performance - including student achievement against the objectives.

We support Tawhai School to empower our tamariki to flourish in an ever-changing world.
